Working from Home – Simplified Expenses

Most people working from home were claiming the £4 per week allowance based on HMRC guidance, but this has now been updated for the self employed.

You can now calculate your allowable expenses using a flat rate based on the hours you work from home each month.

This means you don't have to work out the proportion of personal and business use for your home, eg how much of your utility bills are for business.

The flat rate doesn't include telephone or internet expenses. You can claim the business proportion of these bills by working out the actual costs.

You can only use simplified expenses if you work for 25 hours or more a month from home.

Hours of business use per month Flat rate per month

| | |
|--------------|-----|
| 25 to 50 | £10 |
| 51 to 100 | £18 |
| 101 and more | £26 |

Example

You worked 40 hours from home for 10 months, but worked 60 hours during 2 particular months:

10 months x £10 = £100

2 months x £18 = £36

Total you can claim = £136

New rules for Directors Loans

Its very common in Small Businesses for the Directors Loan account to be overdrawn creating a Directors Loan.

If the loan isn't repaid within 9 months of year end the company will pay temporary additional Corporation Tax at the rate of 25% on the balance outstanding.

Section 455 CTA 2010 liabilities must be included in a company's CT600 tax return. The S455 tax forms part of the calculation of tax payable by the company under Paragraph 8 Schedule 18 FA 1998.

A claim to relief under Section 458 is a claim for relief against the original tax charge for the AP in which the loan was made. The time limit for the claim is four years from the end of the financial year in which the loan is repaid, released or written off. COM53120

Until now there has been no set format for writing to HMRC to reclaim the s.455 tax but now you must use form L2P to enable a close company which has paid tax on a loan to a participator to reclaim that tax once the loan has been repaid, released or written off.
